

We stock the dual temperature dispensing tap (hot 190 degree F, chilled or line temperature) in three basic styles and we can special order additional colors/finishes. Regardless of the faucet style it must be ordered with our Hot Tank to make the system complete and for warranty purposes. Use of another manufacturer's tank with our dispensing tap is not recommended and will void all warranties. Likewise, use of another manufacturer's faucet with our tank is not recommended & will void all Warranties!

	Product Number	Model / Description	List Price Each
